# HIGHLIGHTS

# KEY UPDATES

During the 2022-2023 academic year, our organization utilized independent Google Meet sessions to conduct our tutoring. To enhance student security and ensure greater reliability, we transitioned to a dedicated tutoring software for the 2023-2024 academic year.

The transition to this new software, featuring immediate meeting recordings and automated screening, has significantly boosted the trust and comfort of hundreds of students and parents, ensuring a secure and reliable environment for all tutoring sessions.
